TROUBLESHOOTING

THE SMART CURTAIN LIGHTS DO NOT APPEAR ON THE APP

- If the controller's light is not blinking rapidly, hold down the power button for 5 seconds until the light flashes rapidly to reset it.
- Ensure Bluetooth and Wi-Fi are enabled on your smartphone.
- Ensure the Wi-Fi signal is strong where it is being installed.
- Make sure you are connected to a 2.4GHz Wi-Fi network. Most modems/routers support both 2.4GHz and 5GHz bands and may use the same Wi-Fi network name (SSID) for both bands. Log into the router's settings and check:
 - Is 2.4GHz band enabled?
 - If both 2.4GHz and 5GHz bands are using the same SSID, find the settings that allow you to separate the 2.4GHz and 5GHz bands. Usually, there will be an option to configure each band individually. Change the SSID for one or both bands to make them distinct.

TROUBLESHOOTING

continued...

For instance, “NetworkName_2.4GHz” and “NetworkName_5GHz”.

- If you are using Telstra Smart Modem, refer to the following guide to resolve band steering issues: <https://www.laserco.com.au/Telstra-NBN-Gen-Smart-Modem-Fix>

WARNINGS AND CAUTIONS

- 1.** Keep this product out of reach of infants and young children. Children should only use it under adult supervision.
- 2.** Don't leave the power cord on the floor to prevent tripping.
- 3.** Avoid using or storing the device in humid places such as bathrooms, as well as in dust or dirt. Doing so may cause damage to components and electronics.
- 4.** Don't put the device in a hot place as it can reduce its lifespan and damage plastic components.
- 5.** Do not hit or throw the device with force, as this could damage its delicate structure.
- 6.** Avoid using strong chemicals, cleaners, or detergents to clean the device.
- 7.** If you detect an unusual smell, heat, discoloration, deformation, etc., please stop using the device right away.
- 8.** The lights may not work properly if radio frequency interference is present during operation.
